

Measure your driveway curb

Record measurements in inches. Keep your vehicle parked out of the way.
These illustrative diagrams are not to scale and do not establish ramp compatibility.

Side view

A. Curb rise

Measure vertically from the gutter surface to driveway-edge height.

B. Front-to-back space

Measure from the proposed street-side ramp edge to the driveway edge.

Record A and B at several points, looking from the street toward the driveway.

Measurement (inches)	Left	Center	Right
A. Curb rise			
B. Front-to-back space			

C. Coverage along the curb

Record the width that covers all entry and exit tire paths, including turns.

Coverage needed (inches): Measure your own paths.

Photos and details to include

Side view of curb / Full entrance / Close-up of gutter / Vehicle and scrape location

Product reference: 144 in. along curb x 17 in. front to back x 3 in. high.

These are product dimensions, not maximum curb heights or a fit guarantee.

Send measurements and photos to care@smoothcurb.com before ordering if unsure.
